

ANNAPPA M

Senior DevOps Engineer | SRE | Platform Engineer | Cloud & Infrastructure Automation

📍 Davanagere, Karnataka, India | 📞 +91-9900657021 | ✉ annappabca@gmail.com | 🌐 github.com/Ani-k8s | 🌐 linkedin.com/in/annappa-m

PROFESSIONAL SUMMARY

Senior DevOps & SRE Engineer with **8.5+ years** of enterprise IT experience at **Wipro Technologies**, specialising in **CI/CD pipeline automation**, **Kubernetes orchestration**, **Docker containerisation**, **AWS cloud infrastructure**, and **Terraform Infrastructure as Code**. Proven record of sustaining **99.9% production uptime**, cutting repeat incidents by **30%**, and reducing manual release effort by **50%** through end-to-end automation. Hands-on builder with live **GitHub DevOps projects** and continuous self-improvement through industry learning and current DevOps practices. **Immediate joiner — open to PAN India relocation.**

TECHNICAL SKILLS

CI/CD & Automation	Jenkins, GitHub Actions, GitLab CI/CD, Azure DevOps, Pipeline-as-Code, Build Automation
Cloud Platforms	AWS — EC2, S3, IAM, VPC, CloudWatch, Lambda, Route53 Azure (Exposure)
Infrastructure as Code	Terraform (Modules, Workspaces, Remote State, S3 Backend) CloudFormation (Exposure)
Containers	Docker, Docker Compose, Multi-stage Builds, Image Optimisation, Container Registry
Orchestration	Kubernetes — Deployments, Services, ConfigMaps, Rolling Updates, Liveness/Readiness Probes
Monitoring & Alerts	Prometheus, Grafana, AWS CloudWatch, ELK Stack (Exposure), Log Analysis, Alerting
Scripting & Automation	Python, Bash/Shell Scripting, YAML, JSON, Automation Workflows
Version Control	Git, GitHub, GitLab — Branching Strategies, PR Reviews, Merge Workflows
OS & Platforms	Linux (Ubuntu, RHEL, WSL), Windows Server, System Administration
Methodologies	DevOps, Agile/Scrum, ITIL, Release Management, Incident Management, SLA/SLO, RCA

PROFESSIONAL EXPERIENCE

Wipro Technologies — Senior Project Engineer

Sep 2015 – Feb 2024 | Bangalore, India

Global MNC IT services firm (Fortune 500 partner) — delivered across 3 enterprise engagements in DevOps, production support, and QA domains.

▸ Holmes Endpoint Solution — DevOps & Deployment Support

Owned complete **application deployment lifecycle** — environment configuration, release validation, and post-deployment verification across 24x7 enterprise production systems.

Built and maintained **Jenkins CI/CD pipelines**, reducing manual deployment effort by **50%** and enabling consistent, repeatable release cycles across dev, staging, and production.

Containerised application workloads using **Docker**, cutting environment inconsistency by **40%** and standardising delivery across infrastructure teams.

Administered **Linux (Ubuntu/RHEL)** servers for deployment verification, log analysis, and health monitoring — maintaining **99%+ system uptime** in production.

Enforced **change control and release governance**, ensuring zero unauthorised production changes and full audit compliance.

▸ WCCLG — L2 Production Support & Incident Management

Provided **L2 production support** for mission-critical applications, sustaining **99.9% SLA-driven uptime** across business-critical services.

Conducted structured **Root Cause Analysis (RCA)** and post-incident reviews — permanent fixes reduced repeat incidents by **30%**.

Authored and maintained **operational runbooks and SOPs**, improving MTTR and accelerating new-engineer onboarding. Managed **patch and hotfix deployments** end-to-end within SLA windows — **zero failed rollbacks** across all releases.

▸ OneForce — QA, Release Validation & DevOps Integration

Executed **functional, regression, and smoke testing** on enterprise builds — **zero critical post-release defects** across multiple delivery cycles.

Integrated **automated quality gates** into CI/CD pipelines, enabling shift-left testing and reducing QA cycle time.

Managed complete **defect lifecycle in JIRA** — tracking, resolution, and stakeholder reporting.

KEY ACHIEVEMENTS

- 8.5 years of continuous enterprise delivery at Wipro

99.9% production uptime across all client environments

30% fewer repeat incidents via RCA + runbooks
- 40% reduction in deployment failures via Docker

50% less manual effort via Jenkins CI/CD automation

Zero rollback failures across all managed deployments

DEVOPS PROJECTS & HANDS-ON PRACTICE

Project 1: End-to-End CI/CD Pipeline — Jenkins + Docker + Kubernetes🔗 github.com/Ani-k8s/devops-ci-cd-pipeline

Designed **multi-stage Jenkins pipeline**: code commit → automated build & test → Docker image push → Kubernetes rolling deployment — full GitOps-style lifecycle automation.
Containerised Python microservice with **optimised multi-stage Dockerfile**, reducing image size by **60%**; versioned and pushed to container registry.
Deployed on **Kubernetes (Minikube)** using declarative YAML manifests — Deployments, Services, ConfigMaps, liveness/readiness probes — zero-downtime delivery.

Project 2: AWS Infrastructure Automation — Terraform IaC Personal Lab | AWS + Terraform

Provisioned **AWS infrastructure** (EC2, VPC, Security Groups, IAM, S3) using reusable **Terraform modules** with remote state (S3 backend) and workspace-based environment isolation.
Automated **full environment lifecycle** (create/update/destroy) for dev, staging, and production — eliminating manual provisioning drift and enforcing infrastructure consistency.

CONTINUOUS LEARNING

AWS Cloud Architecture & Infrastructure Automation	Udemy & AWS Official Docs Ongoing, 2025–26
Kubernetes Orchestration & Container Management	Udemy & CNCF Resources Ongoing, 2024–26
Terraform & Infrastructure as Code	Udemy & HashiCorp Documentation Ongoing, 2025–26
Jenkins, GitHub Actions & GitOps Workflows	YouTube & Hands-on Labs Ongoing, 2024–26
Linux Administration, Bash Scripting & Python for DevOps	YouTube & Practice Projects Ongoing, 2024–26
DevOps Industry Trends & Emerging Practices	CNCF Blog, InfoQ, ThoughtWorks Tech Radar Weekly

EDUCATION

M.Tech — Integrated (Computer Science & Engineering)	2020
Vellore Institute of Technology (VIT)	Vellore, Tamil Nadu, India
