

ANNAPPA M

AWS DevOps Engineer | Cloud Infrastructure Specialist

Davanagere, Karnataka, India • +91-9900657021 • annappabca@gmail.com
github.com/Ani-k8s • linkedin.com/in/annappa-m

Professional Summary

Experienced enterprise IT professional with **8.5+ years** at Wipro Technologies, with responsibilities evolving toward **DevOps, Automation, Cloud Infrastructure, Reliability Engineering, and Platform Operations**. Deep expertise in **AWS cloud services (EC2, S3, IAM, VPC, Lambda, EKS, CloudWatch), Infrastructure as Code (Terraform, CloudFormation), CI/CD automation (Jenkins, GitHub Actions, GitLab CI/CD), container orchestration (Kubernetes, Docker), and production support at enterprise scale**. Proven record of sustaining **99.9% production uptime, reducing repeat incidents by 30%** through structured Root Cause Analysis, and improving deployment efficiency by **50%** through automation. Hands-on expertise with Prometheus, Grafana, CloudWatch, Linux administration, Python and Bash scripting, and DevOps best practices. Currently advancing technical skills through structured DevOps upskilling with hands-on projects covering AWS, Kubernetes, Terraform, and cloud-native technologies. Passionate about building reliable, scalable infrastructure and operational excellence. Immediate joiner — open to relocation.

Core Competencies

AWS • EC2 • EKS • S3 • IAM • VPC • Lambda • CloudWatch • Docker • Kubernetes • Terraform • CloudFormation • Infrastructure as Code • Jenkins • GitHub Actions • GitLab CI/CD • CI/CD Automation • Linux Administration • Bash Scripting • Python • Monitoring • Prometheus • Grafana • ELK Stack • Production Support • Incident Management • RCA • SLA/SLO Management • High Availability • Troubleshooting • Containerisation • DevOps • Reliability Engineering • Automation • Agile

Technical Skills

Cloud Platforms

AWS — EC2, EKS, S3, IAM, VPC, Lambda, Route53, CloudWatch, CloudFormation, Systems Manager

Containers & Orchestration

Docker, Kubernetes, Docker Compose, Helm, YAML, Rolling Updates, Scaling

CI/CD & Automation

Jenkins, GitHub Actions, GitLab CI/CD, Pipeline Automation, Release Management, Deployment Automation

Infrastructure as Code

Terraform — Modules, Workspaces, Remote State, S3 Backend, CloudFormation

Monitoring & Observability

Prometheus, Grafana, CloudWatch, ELK Stack, Log Analysis, Alerting, Health Checks, Metrics

Programming & Scripting

Python, Bash/Shell Scripting, YAML, JSON, Automation Scripts

Operating Systems

Linux (Ubuntu, RHEL, CentOS), Unix Administration, Linux Hardening, User Management

Version Control

Git, GitHub, GitLab, Branching Strategies, Merge Workflows, Repository Management

Production Support & Reliability

Incident Management, RCA, SLA/SLO Compliance, High Availability, Troubleshooting, Disaster Recovery, Deployment Validation

Methodologies

DevOps, Agile/Scrum, Infrastructure Automation, Cloud Native Practices, Continuous Improvement

Professional Experience

Wipro Technologies — Bangalore, India

Senior Project Engineer — DevOps, Production Support & Cloud Operations

Sep 2015 – Feb 2024

Global IT Services Company | 8.5 Years of Progressive Responsibility

WCCLG — L2 Production Support & Incident Management

- Managed L2 production support for enterprise applications, sustaining **99.9% SLA-driven uptime** across mission-critical systems through proactive monitoring and rapid incident response.
- Established and configured monitoring and alerting infrastructure using Prometheus, Grafana, and CloudWatch to proactively detect system degradation and prevent prolonged outages.

- Conducted Root Cause Analysis (RCA) on production incidents, identifying root causes and implementing permanent fixes that **reduced repeat incidents by 30%**.
- Authored and maintained comprehensive operational documentation, runbooks, support procedures, and incident tracking entries ensuring consistency and institutional knowledge.
- Performed troubleshooting and debugging of complex technical issues across Linux production systems, ensuring high availability and service continuity.
- Collaborated across multiple teams (infrastructure, application engineering, platform) to resolve cross-functional issues and drive platform reliability improvements.
- Identified incident patterns and drove scalable process improvements across teams and platforms to enhance operational resilience.

Holmes Endpoint Solution — DevOps & Deployment Support

- Built and maintained Jenkins CI/CD pipelines, **reducing manual deployment effort by 50%** and enabling reliable, repeatable software delivery across enterprise platforms.
- Supported Kubernetes deployment workflows and Docker containerisation, **improving deployment consistency by 40%** and enhancing operational reliability.
- Performed Linux system administration, monitoring, and operational support ensuring high availability across production environments.
- Automated deployment validation and operational workflows using Python, Bash scripting, and YAML configuration management to reduce manual effort.
- Collaborated with engineering and operations teams to improve platform reliability, deployment automation, and operational efficiency.

OneForce — QA, Release Validation & DevOps Integration

- Integrated automated validation workflows into CI/CD pipelines, supporting continuous delivery with zero critical production defects.
- Executed functional, regression, and smoke testing across releases, ensuring platform stability and deployment readiness.
- Managed defect lifecycle tracking and release coordination using JIRA, maintaining complete issue tracking entries and cross-team communication.
- Collaborated with quality and engineering teams to drive process improvements for operational consistency and release efficiency.

Professional Development & Advanced DevOps Upskilling

Dec 2024 – Present | **Structured Full-Time Technical Development**

Pursuing focused professional development in advanced DevOps, Cloud Infrastructure, and Reliability Engineering through hands-on projects, technical labs, and industry-aligned learning:

- Advancing expertise in AWS cloud services (EC2, EKS, S3, IAM, VPC, CloudWatch) and pursuing AWS Certified Solutions Architect Associate certification.
- Building proficiency in Kubernetes orchestration, advanced Docker containerisation, and cloud-native application deployment patterns.
- Mastering Terraform Infrastructure as Code — modules, workspaces, state management, and enterprise-scale provisioning.
- Developing advanced CI/CD automation using Jenkins, GitHub Actions, and GitLab CI/CD for enterprise-grade continuous delivery.
- Advancing observability and monitoring expertise using Prometheus, Grafana, and CloudWatch for production systems.
- Developing Python and Bash automation scripts for infrastructure provisioning, deployment automation, and operational workflows.
- Creating and publishing hands-on DevOps projects on GitHub demonstrating CI/CD pipelines, Infrastructure as Code, Kubernetes orchestration, and AWS infrastructure expertise.
- Studying cloud-native technologies, platform engineering concepts, and DevOps best practices for scalable, reliable systems.

Feb 2024 – Dec 2024 | **Family Responsibility & Personal Commitments**

Dedicated focused time to important family responsibilities and personal commitments while maintaining technical awareness through self-study and strategic career planning.

Projects & GitHub Portfolio

CI/CD Automation Pipeline — Jenkins + Docker + Kubernetes

github.com/Ani-k8s/devops-ci-cd-pipeline

- Designed comprehensive CI/CD workflows for automated build, testing, Docker image creation, and Kubernetes deployment automation.
- Implemented Kubernetes deployments using YAML manifests with rolling updates and zero-downtime deployment strategies.
- Configured monitoring, deployment validation, and automated alerting workflows using Jenkins and GitHub Actions.
- Demonstrated production-grade CI/CD practices including automated testing, image versioning, and deployment orchestration.

AWS Infrastructure Automation — Terraform IaC

github.com/Ani-k8s/aws-terraform-lab

- Provisioned AWS infrastructure using reusable Terraform modules with remote state management and automated environment provisioning.
- Implemented Infrastructure as Code best practices including module composition, variable management, and workspace isolation.
- Automated infrastructure lifecycle workflows improving consistency, reliability, and operational efficiency across environments.
- Demonstrated expertise in VPC, EC2, S3, IAM, Security Groups, and Route53 configuration through Terraform modules.

Key Achievements

- **99.9% production uptime** sustained across enterprise systems through proactive monitoring, incident management, and operational excellence.
- **50% reduction in manual deployment effort** via Jenkins CI/CD pipeline automation and process optimisation.
- **30% reduction in repeat incidents** through disciplined Root Cause Analysis and permanent process improvements.
- **40% improvement in deployment consistency** via Docker containerisation and Kubernetes orchestration.
- **Zero rollback failures** across all managed production releases, demonstrating deployment quality and operational discipline.
- **8.5 years** of progressive enterprise IT and production support experience with clear evolution toward DevOps and Cloud Infrastructure.

Education

M.Tech — Integrated (Information Technology)

2020

Vellore Institute of Technology (VIT), Tamil Nadu, India

Completed through an employer-sponsored integrated higher education program while working full-time at Wipro Technologies.

Certifications & Continuous Learning

- AWS Certified Solutions Architect Associate (SAA-C03) — In Preparation (2025–26)
- Kubernetes Orchestration & Container Management — CNCF Resources & Hands-on Labs (Ongoing 2025–26)
- Terraform & Infrastructure as Code — HashiCorp Documentation (Ongoing 2025–26)
- GitHub Actions & Advanced CI/CD Workflows — Hands-on Labs & Practice Projects (Ongoing 2025–26)
- Prometheus, Grafana & Observability Engineering — Self-Study & Monitoring Labs (Ongoing 2025–26)
- Python & Bash Automation Scripting — Hands-on Practice Projects (Ongoing 2024–26)
